How to Print With Bluetooth on Epson Printer

Print wirelessly without cables or network connections. This guide shows you easy steps to connect and print using Bluetooth on your Epson printer.

OVERVIEW

What You'll Learn

01

Power On Your Printer

Connect and start your Epson printer

02

Enable Bluetooth

Turn on Bluetooth using button or control panel

03

Pair Your Device

Connect computer or smartphone to printer

04

Start Printing

Print documents and photos wirelessly

Important Note: On many Epson models, Bluetooth is mainly used for pairing or setup, while printing may rely on Wi-Fi Direct or another wireless method.

Step 1: Power On Your Printer

Quick Start

Get your printer ready in seconds

Connect the printer's power cord to the wall outlet. Press and hold the **power button** on the machine until it starts flashing.

Once the light is on, you're ready to connect it to Bluetooth.

Step 2: Enable Bluetooth on Your Printer

Turn on Bluetooth to allow your printer to discover nearby devices. Your Epson may have a physical Bluetooth button or internal settings.

Method 1: Bluetooth Button

If your printer has a physical Bluetooth button, press and hold it to enable. When the light flashes, Bluetooth is enabled.

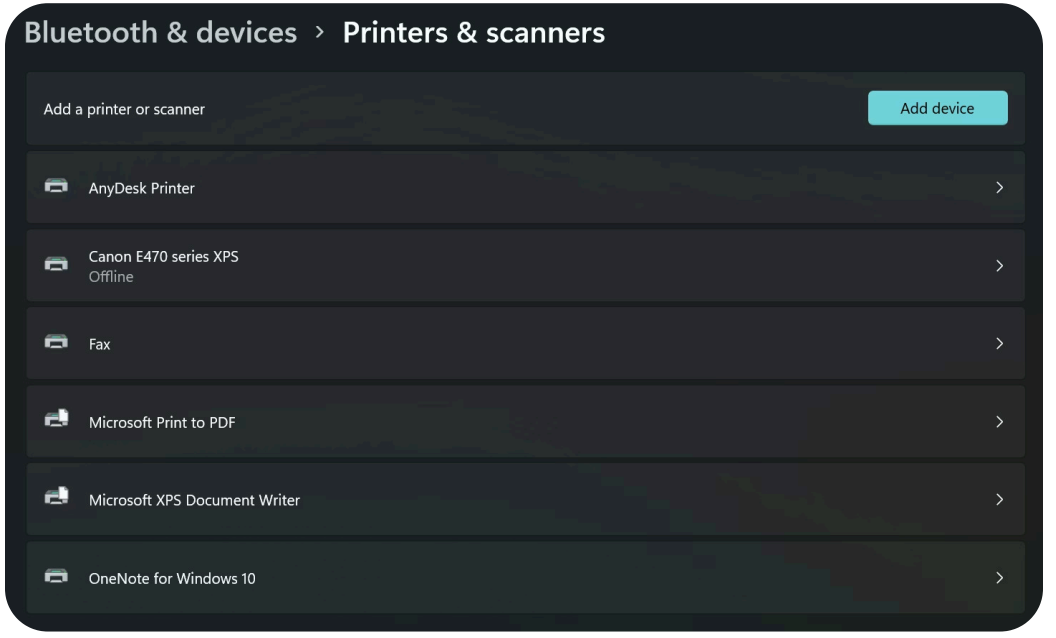
Method 2: Control Panel

Navigate to Settings or Setup on the printer's display. Look for Bluetooth or connectivity option. Select "Enable Bluetooth" or "Pair Bluetooth".

First, check whether your printer supports Bluetooth in the printer manual or on Epson's website.

WINDOWS & MAC

Step 3: Connect to Your Computer



On Windows

1. Go to Start menu and search for Settings
2. Click Bluetooth & Devices, then Printers & Scanners
3. Click Add Device next to Add a printer or scanner
4. Your printer will connect to Windows

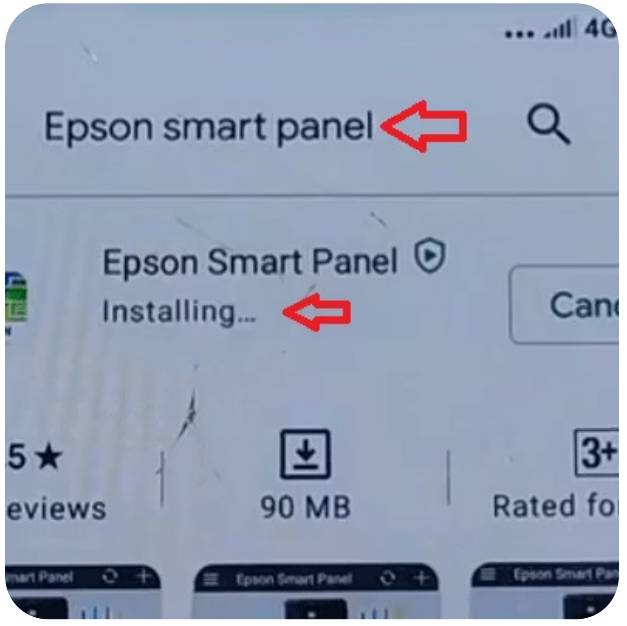
On Mac

1. Go to Apple menu and select System Preferences
2. Select Bluetooth and turn it on
3. Select Printers & Scanners, click the (+) sign
4. Select your printer from the list and click Add

MOBILE SETUP

Connect to Your Smartphone

Install the **Epson Smart Panel app** to pair your printer with Android or iOS devices.



Android Setup

Open Play Store, search for Epson Smart Panel, and install. Turn on Bluetooth in Settings > Connected devices. Open app and add printer.

AirPods Pro
Not Connected

iOS Setup

Go to App Store, search for Epson Smart Panel, and install. Enable Bluetooth in Settings. Open app and select your printer from the list.

Step 4: Start Printing

Computer Printing

Windows: Open your document and press Ctrl + P to initiate printing.

Mac: Open your document, go to File menu, select Print, and choose your printer from the drop-down menu.

Mobile Printing

Android/iOS: Open Epson Smart Panel app, select your connected printer, tap Print option, choose photos or documents, adjust settings like paper type, and tap Print to start.

Keep your printer and device within 10-15 feet of each other to avoid connection issues.

Troubleshooting Common Issues

Check Bluetooth Support

Verify your printer model number in the user manual or on **Epson's official website** to confirm Bluetooth connectivity options.

Device Not Detecting Printer

Ensure devices are within 10-15 feet. Verify printer is properly connected to power and turned on. Try setting up the printer again.

iPhone Bluetooth Printing

Yes, you can print from iPhone using Bluetooth. Enable Bluetooth on both devices, go to Settings on iPhone, select your printer, and use **Epson Smart Panel app**.
